

CAPABILITY STATEMENT

Technology infrastructure and coordinated field support for government buyers and prime contractors.

KnC supports installations, upgrades, network refreshes and onsite troubleshooting across the Southeast through responsive project coordination and an extended technician network.

William Cody Hunter
Managing Member

Core Competencies

- **Structured Cabling**
CAT5e, CAT6 and CAT6A installations; moves, adds and changes.
- **Fiber Optics**
Fiber installation, termination and infrastructure replacement support.
- **Network and Wireless**
Network refreshes, equipment deployment and wireless access point installations.
- **Physical Security**
CCTV, video surveillance and access-control system deployment.
- **Telecom and Field IT**
VoIP support, onsite troubleshooting and technology rollouts.
- **Project Delivery**
Project coordination, systems integration and scalable field resources.

Differentiators

- ✓ Direct access to company leadership
- ✓ Flexible staffing and regional technician coverage
- ✓ Lean delivery model for subcontract support
- ✓ Responsive coordination from scope to closeout

Leadership Experience

15+ YEARS

Combined IT experience across company leadership.

William brings IT project management experience from LMI, supporting technology delivery and coordination.

Commercial Experience

WIN Reality

Four California sites; per site: 2 AI-recognition IP cameras (200 fps), 1 computer, 1 LED, 3 Cat6 runs (60-100 ft avg), 2 power cables. KnC handled camera/LED mounts and cabling; each site completed in one day with same-day calibration/testing.

Williams Jet Center

Website and digital operations support.

Moustache Hookah Lounge

Employee platform and workflow support.
